# STUDIO PRESENTATION

Prestige Smile is a private studio specializing inProfessional cosmetic teeth whitening, located atAmbilly, on the outskirts of Geneva.

Each session takes place in an environmentneat, secure and professional, according to a professional protocol that respects enamel and gums.

Thanks to a mastered technique, teeth can belightening of up to 7 shades from the first session.

Each service ispersonalized approach, in order to adapt to the initial shade of your teeth and to guarantee a lasting result.

# The founder of Prestige Smile

I createdPrestige Smile with the aim of offering aesthetic teeth whitening combininghigh standards, precision and attention to detail, in order to achieve visible results while maintaining a natural and harmonious appearance.

Particularly attentive to the quality of the result, I have always been fully committed withdetermination and perseveranceIn each of my projects, a requirement has led me to develop a premium service that meets expectations.

Trained in cosmetic teeth whiteningI developed an approach based on amastered professional protocolallowing visible results from the first session, while respecting the health of the enamel.

Beyond the result, I place paramount importance on providing an experiencecaring, attentive and completely personalizedto each customer, where every detail is designed for your comfort.

## Before/After

# WHO IS THE TREATMENT FOR?

Cosmetic teeth whitening is aimed atadults (18 years and older)wishing to regain a brighter smile and revive the natural radiance of their teeth.

This treatment is particularly suitable:

- teeth yellowed or stained by coffee, tea or tobacco
- to those wishing to revive the brightness of their smile
- to anyone wishing to improve the aesthetics of their smile
- as part of regular cosmetic maintenance

Since every smile is unique, every session is uniquely...personalizedin order to obtain a natural, harmonious result perfectly suited to your initial shade.

# Contraindications

For safety reasons, teeth whitening is not recommended in the following cases:

- people under 18 years of age
- pregnant or breastfeeding women
- untreated cavities
- infections or inflammation of the gums (gingivitis, periodontitis)
- significant tooth hypersensitivity
- presence of crowns, veneers or implants on visible teeth

AndConfidential health questionnaireis systematically sent before the session in order to verify your eligibility and guarantee a suitable treatment in complete safety.

# Important information

The teeth whitening offered byPrestige Smile This is a cosmetic, non-medical, and non-invasive treatment. It does not replace a diagnosis or treatment performed by a dental surgeon.

Results may vary depending on the initial tooth shade, the condition of the enamel, and lifestyle habits.

A scaling performed within 1 to 2 months prior to the session is recommended in order to optimize the result.

Temporary tooth or gum sensitivity may occur after the session.

# Why get your teeth whitened?

Over time, teeth can lose their natural shine. Certain habits such as consuming coffee, tea, red wine, or tobacco can gradually alter the color of the enamel.

Cosmetic teeth whitening lightens the natural shade of teeth, resulting in a visibly whiter, brighter, and more harmonious smile.

At the house of Prestige SmileThe protocol acts on the pigments responsible for discoloration while respecting the enamel and gums.

A first session allows you to obtain a visible result.

For a more intense and longer-lasting lightening effect, two sessions spaced apart48 hoursmay be recommended.

The results can then be maintained on averagebetween 8 and 12 months, according to lifestyle habits.

# FOR A MORE INTENSE RESULT

A first session already allows you to obtain a visible result.

For a more intense and lasting lightening, a protocol intwo sessions spaced 48 hours apartmay be recommended, especially for darker or more marked teeth.

This protocol allows:

- to intensify the lightening
- to obtain a more uniform shade
- to optimize the maintenance of the result

# How a session unfolds

## How does your session at Prestige Smile unfold?

Each session is conducted according to a precise protocol, in order to offer you a comfortable, safe experience and optimal results.

1️⃣ Diagnosis & eligibility

Before your appointment, you will be sent a confidential health questionnaire to

check for any contraindications.
A quick diagnosis is also carried out on site.

2️⃣ Analysis of the initial shade

The shade of your teeth is assessed using a professional shade guide, in order to determine your starting point and precisely measure the result obtained.

3️⃣ Gum preparation and protection

A gingival protection is carefully applied to preserve the gums and ensure safe treatment.

4️⃣ Application of the whitening gel

A professional gel is applied to the teeth to act deeply on the pigments responsible for the discoloration.

5️⃣ LED lamp activation

The LED lamp activates the gel and allows for gradual and even lightening.

6️⃣ Results & comparison

At the end of the session, the shade is reassessed to concretely observe the lightening achieved.

⏱️ Session duration

Approximately 1 hour

# FAQ

## Frequently Asked Questions

### Is teeth whitening painful?

The treatment is painless.
Some people may experience slight sensitivity during or after the session, but it is temporary and usually disappears within 24 hours.

## Are the results visible from the first session?

Yes, a result is visible from the first session.
Depending on the initial shade, a two-session protocol may be recommended for a more intense and lasting result.

## How many shades can you gain?

Teeth can be whitened up to7 shades, depending on the initial shade.

## How long does the result last?

The stability of the result depends on the protocol followed and lifestyle habits (coffee, tea, tobacco, etc.).

• After a sessionthe result generally remains between6 and 8 months. • After a complete protocol (2 sessions), the results can remain on average between8 and 12 months, with a more intense and lasting lightening.

To maintain optimal shine over time, a maintenance session can be considered starting from6 months, according to your needs.

## Does teeth whitening damage teeth?

No. The protocol used is respectful of enamel and gums when carried out under the prescribed conditions.

## Does the treatment work on all teeth?

Teeth whitening only works on natural teeth.
Crowns, veneers and implants do not respond to the treatment.

## Should I have my teeth cleaned before the session?

Yes, descaling is recommended.in the weeks leading up to the sessionin order to optimize the results of whitening.

## Is it possible to eat or drink after the session?

Yes, you can eat and drink after your session.

However, during the24 to 48 hours following treatmentIt is recommended to avoid foods and drinks that may stain teeth, in order to optimize and prolong the result.

## To be limited during this period:

- coffee, tea, red wine, sodas and colored drinks
- red fruits (raspberries, blueberries, cherries…)
- colorful sauces (tomato, ketchup…)
- pigmented spices (curry, paprika…)
- tobacco

Acidic foods (lemon, grapefruit, etc.) should also be avoided in order not to sensitize the enamel.

## Are there any contraindications?

Yes. The treatment is not recommended in certain cases (pregnancy, untreated cavities, infections, significant hypersensitivity, etc.).
A health questionnaire is systematically sent before the session to ensure your safety.

## Who is teeth whitening for?

The treatment is aimed at adults (18 years and over) wishing to regain a brighter smile and improve the aesthetics of their teeth.

## How often can I have my skin bleached?

An interview session can be considered every6 to 12 months, according to your needs and lifestyle.
